Important Messages

CAUTION!

To avoid premature degradation of the surface coating never use an abrasive cloth, sponge or other similar device on the surface. Carefully follow manufacturer instructions for recommended exposure time of cleaner on surface. Wipe off cleaning product residue with a clean, soft cloth after cleaning and allow the surface to dry completely before use.

IMPORTANT INFORMATION:

Cleaners/disinfectants can cause discolouration/bleaching on some colours. To avoid discolouration, always check on a small area first.

Information contained here is purely related to the compatibility of cleaners with **Carrflex®** materials and in no way relates to the efficacy of any cleaner for infection control or the safety of any cleaner for skin contact.

Testing info is specific to the products or formulations listed and in no way constitutes approval for other products from any brand listed without being tested.

All approvals are based on manufacturer recommended dilution with water unless otherwise specified and approval is void for any improper dilution.

Never mix different cleaners. Results can be deadly.

If you wish to change from one approved cleaner to another, thoroughly rinse the surface with warm water, allow to dry completely and repeat this process one more time prior to use of another cleaner.

If a particular cleaner/disinfectant is not listed, we advise to test the specific product in advance or to contact us to conduct testing.

Listed chlorine based cleaners should be used only in instances of irregular spot cleaning and bodily fluid spills.
